50+ hook skeletons

Swipe the *shape*, not the words. Fill the **[brackets]** with your product's pain and payoff. One curiosity gap OR one specific number per hook — never both.

- Here's what the label should actually say.
- What [category] companies don't want you to know.
- The one ingredient/feature that actually matters in [category].

Rewrite rule

Read every hook out loud before you use it. If it sounds like an ad → rewrite. If it sounds like a friend texting you → ship it. Avoid “best / miracle / revolutionary” — they trigger both ad rejection and viewer skepticism.

Shot-by-shot brief template

Hand this to every creator so their video is built on the framework. Copy it, fill the [brackets], send it with the sample.

FIELD	FILL IN
Product + link	[product name] — tag in the video, orange cart
Who it’s for	[target customer + their #1 pain]
Angle / pillar	[Pain Point / Demo / Social Proof / Lifestyle / Trend / Comparison / BTS]
HOOK (0–3s)	[the scroll-stopper — pull one from the Hook Library]
PROBLEM (3–8s)	[agitate the pain in “you” language]
SOLUTION (8–15s)	[show product in action — 1–2 features max]
PROOF (15–22s)	[review / before-after / number — keep outcome claims as YOUR experience]
CTA (22–30s)	“Tap the orange cart.” [+ honest urgency only if real]
On-screen text	[3–4 caption overlays, bold, word-by-word]
Sound	[trending sound / soft music bed at ~10–15%]
Caption	[mirror the hook, <100 chars]
Hashtags	[3–5: mix broad + niche + brand]
Do NOT say	[compliance red-lines for this product — see Vault 03]

Format pairing: pick a proven format to match the hook — Reaction, Emotional close, Before & After, Reveal story, Authority reaction, Comparison, Morning routine, Explainer, or Unboxing. Put at least one Reaction and one Emotional-close in every batch.

Pre-flight checklist

Run this on every script — yours and every creator’s — before it ships. One disabled ad costs more than a slightly weaker hook ever will.

Kill it if it contains...

- ☐ “Cures / treats / eliminates / shrinks” applied to the product
- ☐ A named disease or medical condition
- ☐ “FDA approved” (for a supplement)
- ☐ “Clinically proven to [outcome]”
- ☐ “Guaranteed to work”
- ☐ “Replaces [prescription / medical care]” as YOUR claim
- ☐ Fear-based CTA (“before it’s too late”)

Ship it when...

- ☐ Claims use “supports / may help / promotes”
- ☐ Every outcome is a customer’s quoted experience
- ☐ Mechanism is factual (“[ingredient] supports [function]”)
- ☐ Authority is “developed with [experts]” not “doctors say”
- ☐ Risk-reversal is stated (“90-day guarantee”)
- ☐ CTA removes friction (“tap the orange cart”)

Say this, not that

TEMPTED TO WRITE	USE INSTEAD
“Shrinks [problem]”	“Daily [category] wellness support”
“Cures [condition]”	“Helps maintain a normal [function]”
“Will fix your...”	“May help support...” / “Customers report...”
“Doctors recommend”	“Developed with [experts]”
“Proven to [outcome]”	“Made for [benefit], the honest way”
